Customer Story in Milwaukie, Oregon

Annual Furnace Tune-Up for a Satisfied Customer

Problem:

Milwaukie resident Mike has been a Four Seasons customer for five years. Every year, he schedules an annual furnace tune-up to make sure the system is operating efficiently and to catch any problems before they become serious.

This past fall, Mike knew his furnace was due for a tune-up, so he called Four Seasons and made an appointment.

Solution:

On the scheduled day, we sent one of our trusted technicians, David, to Mike's home to perform the tune-up. David first asked Mike if he had experienced any issues related to his furnace, then proceeded to inspect the system. He tested the controls, lubricated the blower motor and cleaned the burners, which were dirty after several months of running steadily.

Once the tune-up was complete, David explained to Mike everything he had done. He also gave Mike some tips on how to use the Nest thermostat to cut down on energy bills during winter.

After all was said and done, Mike had this to say about his experience with David and Four Seasons:

"I would highly recommend Four Seasons"

I have been using Four Seasons Heating and A/C since my new equipment installation 5 years ago. The office personnel that book my service are very polite keep me informed as to my service date and time. The service technicians are very knowledgeable, neat and efficient. They will even take the time to explain what they have done. .

Today, I needed an annual furnace tuneup and was very impressed with David E, the service technician. He asked me if there were any issues with my heating, checked my Nest thermostat, cleaned the furnace parts and then made some furnace adjustments to help make my heating system more efficient.

Their annual service contract of 149.00 is a great value if you also have air conditioning. This includes a furnace tune up in the winter and an A/C tuneup before the summer. I would highly recommend Four Seasons Heating and A/C.

—Mike C. | Milwaukie Homeowner
